

India Peace Centre welcomes Shri Syed Faizan Ali

Air pollution has become a bigger problem than ever before. Traffic, industry and many other areas are polluting the air, causing health problems and climate change. If we continue living like we used to, we will cause changes in our environment which will be irreversible. Shri Syed Faizan Ali decided, that he won't just accept the pollution, but that he wants to make changes on his own. Last November, he started riding with his bicycle through India, to set a sign to protect the environment.

On 31st December 2018 he passed Nagpur and was welcomed in India Peace Centre to share his ideas and experiences. He talked about the importance to protect the environment. Special thanks go to Pratishruti Singh Agrawal who was in charge to organize the whole event and provided some snacks after the program. The following day Shri Syed Faizan Ali left Nagpur and continued his journey to spread his ideas and to make more people think about that important topic.

India Peace Centre wishes him all the best for the future and his journey.
